rotekservices.com

24-hour service available

Rotek Services brings together skilled professionals and advanced technology to maximize reliability and enhance competitiveness.

Our technicians not only have the experience and resources to successfully complete the repair process, but they also have the goal to meet and exceed our customers' expectations.

As an SKF Certified Motor Rebuilder, we have been recognized and rewarded by SKF Bearing's commitment to growth and excellence by becoming one of only a few certified SKF electric motor repair shops in North America. Our technicians are required to participate in ongoing workforce training to keep in-line with technological changes.

We provide a range of motor repairs, up to 10,000 hp:

- AC/DC motor repair and rewind
- Synchronous motor repair and rewind

Our equipment to support these repairs includes:

- High capacity ovens
- Large capacity balance stands
- Large test stand with output voltages from 60 to 13,800 VAC
- Computer controlled VPI System
- Advanced electronic motor test equipment
