24-hour service available

Our field service team of professionals focus on extending service life as well as improving facility up-time. Let us take over your motor maintenance so you can stay focused on your core business.

Our on-site services include:

- Turn-key removal, repair and reinstallation of equipment
- On-site rewinding, cleaning and testing of motors
- On-site dynamic balancing of rotating assemblies
- Laser alignment of rotating equipment
- Predictive Maintenance, including:
 - *Vibration analysis and monitoring programs*
 - *On-site new motor acceptance testing and reporting*
 - *MCE off-line and MCEmax on-line motor testing and reporting*
 - *Infrared thermography surveys*
 - *On-site medium and high voltage capacitance tip-up/tan delta testing*
 - *Motor shaft voltage surveys for VFD driven equipment*

Contact us directly at (316) 263-3131 to discuss any of our on-site services.
